Collectible Type (Low Mintage, Low Pop and More)				
3741601	1001	1766 William Pitt Half Penny "Cracked Planchet" -- NCG MS63BN (Mint Error)	\$4,500.00	Betts-519, Breen-251, W-8350, R.3. Copper. From a historical standpoint, the Pitt farthings and halfpennies rank among the most important Colonial issues of early America. This issue commemorates the efforts of William Pitt to have the Stamp Act repealed. The current piece is remarkable on several levels. It is a technical mint error struck on a cracked planchet that is visible from the obverse border at 10:30 and the reverse border at 7:30, extending in toward the center of the flan. It is also an amazing Mint State specimen, one of the finest we have seen. This is only the 10th auction appearance of a Mint State Pitt halfpenny in any of our sales since 1993. Both sides have a lovely blend of tan and chocolate color with beautiful, original surfaces. Census: 1 in 63 Brown, 2 finer (4/10). CDN Collectors Price Guide...\$12,100. Only three finer certified by NGC.
3636901	1233	1855 Half Cent - NGC MS66 BN	\$1,350.00	Tied for finest known. An unabrased and undisturbed type coin with intermingled olive-brown, ebony, and faded red color on each side. The strike is bold. NGC Price Guide...\$2700.
25671403	2204	1899 Indian Cent MS67RD PCGS	\$4,950.00	Only 2 Finer Known. Coppery-gold coloration and swirling, frosty luster are sure to please collectors looking for this superb premium 19th
3856501	2921	1969-S 1C Double Die Obverse - PCGS AU53	\$19,000.00	Mintage...15. Ranked #1 in 100 Greatest U.S. Modern Coins. The 1969-S doubled die Lincoln cent is one of the most dramatic and arguably the rarest variety in the entire series. The variety was first discovered in mid-1970 and was at first erroneously thought by the U.S. Secret Service to be counterfeit. After the confusion was resolved, and collectors were free to pursue these coins, the discovery rate was few and far between. It is believed that no more than 30 pieces are known today in all grades. The doubling can be seen in the word "Liberty" on the obverse. The present Choice AU coin displays original auburn-brown patina, with tinges of coppery-red in the protected regions. The strike is sharp and this is a highly appealing example of this intriguing 20th century rarity. PCGS Price Guide...\$24,000

3734201	3921	1913 Buffalo Nickel, Type 2 - PCGS MS67	\$5,750.00	Among the finest known. A magnificent Superb Gem with radiant satiny luster on each side. Champagne-gold iridescence glistens from the protected areas and across the fields, complementing the otherwise pearlescent silver surfaces. The devices are overall bold and without distractions, lending strong eye appeal to this pristine piece. It ranks among the finest seen by PCGS, with only 6 coins certified finer at MS-67 (Plus).
3843902	3948	1921-S Buffalo Nickel -- NGC MS66	\$13,500.00	None finer certified by NGC. Only a couple CAC coins exist. The 1921-S is both a low-mintage issue with only 1.5 million struck and it is one of the premier strike rarities in the series. The mint luster is frosted, as usual, and each side displays rich reddish toning with occasional bits of lilac interspersed. The all-important strike is strongly brought up on each side. 3993401	4258	1797 15 Stars Half Dime --NGC MS64	\$28,000.00	V-2, LM-1, R.3. Three distinct obverse design subtypes exist for the 1797 half dimes, featuring 13 stars, 15 stars, or 16 stars. The 15 Stars type has an arrangement of eight stars to the left and seven stars to the right. Only a small number of Mint State examples exist, including about four Gems that are slightly finer than this Choice Mint State piece. We place it at about fifth or sixth finest of the variety. The elements are quite boldly defined. Both sides have full satin luster, the obverse pale gray with hints of blue, and the reverse mostly gold with sea-green and iridescent accents. NGC Price Guide...\$44,500.

201408004	4358	1853 Arrows H10C - NGC MS67	\$5,500.00	Among the finest known. The With Arrows 1853 half dime is plentiful for type purposes, although Superb Gems are conditionally rare. This toned MS67 coin displays lavender and gold obverse toning with rose and aquamarine on the reverse. Sharply struck and entirely unabrased. Price Guide...\$10,500
3701507	4461	1796 Bust Dime -- NGC MS64	\$44,000.00	Rare This Choice. The "Hyphenated Date" Variety. Always popular as the first year of regular-issue federal dimes. The JR-6 die marriage is the second-most available 1796 variety, yet it is scarce in Choice Uncirculated condition such as this coin. A ring of blue and reddish-tan album toning surrounds the obverse, with partially reflective fields and a frosted portrait of Liberty. Numerous die cracks include a pair of intersecting cracks with die chipping at the date (the so-called "hyphenated date"). The central strike is sharp despite die cracks that radiate to the centers of both sides. CDN Collectors Price Guide for a common date coin in this series...\$60,500.
3740602	4470	1800 Bust Dime -- NGC MS60	\$17,500.00	Bold and Brilliant 1800 Draped Bust Dime. JR-2. Rarity-4+. Uncommon Mint State preservation for both the issue and the type, this is one of the most significant 1800 dimes. Satiny surfaces also reveal semi-reflective qualities in the obverse field as the coin dips into a light. Beautiful eye appeal with most viewing angles presenting a silver white coin. The strike is bold within fully uniform denticulated borders. Far smoother in hand than one might expect for the assigned grade -- highly recommended for inclusion in an advanced type or variety set.
3741005	4470	1800 Draped Bust Dime -- NGC AU58	\$11,500.00	Only 3 Finer Known certified by NGC. Scarce Near-Mint. Desirable as the last year of the eighteenth century and as a substantially scarcer issue overall, the attractive surfaces make this an especially appealing specimen to any early dime cabinet. Nicely centered and well executed in strike, both sides exhibit overall bold definition within uniformly denticulated borders. A smooth and inviting piece.
3843903	4470	1800 Bust Dime -- PCGS MS62	\$22,000.00	JR-2, R.5, MS62 PCGS. Just two die marriages exist for the 1800 dimes, both share the same obverse with different reverses. All Mint State 1800 dimes are rarities. This MS62 example is exceeded by only a handful of specimens at PCGS. Dappled amber-gold toning intermixes with lilac and bright-silver areas on the obverse, while the reverse is a bit more toned in the same shades. A strong strike on the devices. This lightly toned example offers nice eye appeal and is an important opportunity for the advanced early dime specialist. Population 3 in 62, 4 finer (10/18). PCGS Price Guide...\$22,000,
3728810	4579	1841 Seated Dime - NGC MS65	\$2,500.00	In Gem condition, this date is decidedly rare, and the present example is especially attractive. Forest-green, gold, lilac, and rose toning are a visual delight, and the design elements are sharp.
3728903	4697	1886-S Seated Dime - NGC MS66	\$3,500.00	Low-Mintage Branch-Mint issue. A little more than 200,000 dimes were struck in San Francisco in 1886, making the 1886-S a slightly better date in all grades and genuinely scarce in Mint State. This delightful coin displays vibrant mint luster under iridescent champagne-gold and varying shades of ocean-blue color. The design elements are sharp and eye appeal is excellent. NGC Price Guide...

In this die state, the obverse has yet to form a break through star 3, while a rim cud has developed between ER on the reverse. O-104 is a rare die marriage, as are most varieties for the 1794 half dollar. Interestingly, the reverse die was produced using a unique master hub (see Tompkins p. 437 for distinguishing features). This Fine 12 example exhibits deep gunmetal-gray patina that lightens over the motifs, which show relatively good detail, especially on the eagle. The obverse exhibits numerous crisscrossing adjustment marks, but the surfaces are otherwise smooth. NGC Price Guide...\$12,250

3636914	39201	1794 Flowing Hair Half Dollar O-101A - NGC VF20	\$11,500.00	Strong Details Remain. Tompkins Die State 1/5. This coin may be struck from a late state of the dies, but it shows none of the die sinking responsible for the often-seen weakness in the centers. The eagle's head features a strong outline, and good definition remains on a few of the wing feathers. The same is true of Liberty's portrait, which exhibits partial delineation of the middle curls, not just the lower ones. Patina is lighter over the relief elements than it is in the fields, as expected. A smooth and appealing example of the date. NGC Price Guide...\$25,500.

Only 23,464 Flowing Hair half dollars were struck in 1794, with 11 die varieties known for the date. Star 1 pierces the lowest curl near the center on this coin, and there are 21 berries, arranged 10 left and 11 right on the reverse, that identify the popular O-101 variety. This impressive VF30 example retains some interior detail on the central portion of Liberty's hair and all major design detail remains intact. The pleasing surfaces are blanketed in shades of lavender-gray and golden-brown toning and a shallow scrape below star 8 is the only abrasion of note. Hints of original luster shine through the patina. NGC Price Guide...\$25,500.
3615616	39201	1794 Flowing Hair Half Dollar O-101A - NGC XF40	\$24,500.00	Original Patina. T-7, High R.3. The die crack at the F in OF continues all the way to the final S in STATES, identifying the O-101a die state. Both sides are sharply defined and evenly struck with complete border dentils. On the obverse, Liberty's hair strands and the eye is well-defined. Planchet adjustment marks crisscross the portrait and appear along the lower and right borders. The reverse shows sharp feather detail on the eagle's wings with wear on the breast and neck. Original olive-gray patina blankets each side. NGC Price Guide...\$39,750

3718909	6343	1873 Arrows Half Dollar WB-109, Bold Doubled Die Obverse - NGC MS65	\$8,750.00	Small Arrows, Doubled Die Obverse, WB-109, FS-101, MS65 NGC. This Small Arrows variety exhibits arguably the boldest die doubled obverse in the entire Seated Liberty half dollar series. The doubling is easily seen on Liberty's gown folds, fingers, and foot, as well as the scroll, and the shield stripes which exhibit four lines each instead of the normal three. This variety is rare in Mint State, although the 1873 With Arrows half dollar is a rarity at the Gem grade level regardless of variety. This coin displays soft, satiny luster beneath intermingled shades of burgundy-red, olive-green, and gunmetal-gray toning. The strike is sharp making this an important piece for the advanced Seated half dollar specialist. NGC has seen only seven pieces in this grade (two in MS65+), all varieties included, with just four finer (4/18). CDN Price Guide for a common date in this series...\$15,400.

Splendid green-gray, gold, and crimson peripheral toning encircles the lighter silver-gray centers. The strike is razor-sharp, showing no mentionable weakness on either side -- a pleasing exception to the rule for O-mint coins. Glowing luster radiates beneath the vibrant toning. 3719814	6476	1896-S Barber Half Dollar -- PCGS MS64	\$3,250.00	Dusted with pale silver and gold iridescence, this is a fully struck and satiny near-Gem with pleasingly smooth surfaces throughout. The 1896-S is truly elusive in Mint State. Uncirculated survivors can be accounted for in terms of dozens rather than hundreds. Evidently few examples of this issue were set aside by contemporary numismatists, and as a consequence, quality examples always command high premiums. PCGS Population: 24; 22 finer (MS-67 finest). Olive-gray patina dominates the obverse appearance, although the reverse is predominantly pewter gray in tone with only speckled highlights of the former. Well centered in strike, if a bit lightly impressed over the high points, the detail is still suitably bold for the assigned grade. A small flan flaw at 1 o'clock relative to the obverse border is also evident on the reverse. NGC Price Guide...\$4550. CDN Collectors Guide...\$4800.

Bowers comments in his Silver Dollar Encyclopedia that "tiny dot-like die breaks appear in many other places, particularly between L and I, under nose, before chin, below first star, and under the 6th and 7th stars. The steel used to make this die must have been defective." This coin is mostly grayish-gold with tinges of pinkish-gold appearing on the reverse along with a bit of electric blue.

Prooflike in finish, both sides exhibit satiny devices and mirrored fields beneath an overlay of smoky silver-apricot patina. The strike is quite well executed for the type with sharp definition throughout the design. Solidly graded with a pleasant appearance. Long recognized as one of the more elusive issues in the Liberty Seated silver dollar series, just 7,500 circulation strike 1850 silver dollars were made. 3856502	8533	1929 \$5 Indian - PCGS MS63	\$33,000.00	The final-year 1929 half eagle is the most significant rarity in the series, although its mintage of 662,000 coins would never lead one to suspect that was the case. The issue's lack of availability stems directly from the economic context in which it was produced. By October 1929, the American economy was in freefall -- a position it would remain in through the early to mid-1930s. The five dollar gold coin was not needed in circulation, and few 1929 half eagles were distributed to banks. Instead, the majority sat in Treasury vaults and were melted after 1933. This Select Uncirculated example is strongly struck throughout with mint luster that is softly frosted and radiates over the warm yellow-gold surfaces. PCGS Price Guide...\$43,500.

Black Friday, also known as the Gold Panic, took place on September 24, 1869, when two aggressive financiers, Jay Gould and his partner James Fisk, also called the Gold Ring, cornered the gold market with blatant disregard to the nation's economic welfare. The scandal took place during the Presidency of Ulysses S. Grant, whose policy was to sell Treasury gold at weekly intervals to pay off the national debt, stabilize the dollar, and boost the economy. Here's your chance to own coins from the year this historic event took place.

Exceptionally smooth surfaces on both sides, this impressive Gem also exhibits pleasingly original toning with mottled rose-russet iridescence over a base of warmer pearl gray. Authorized by the Act of March 3, 1899, this silver dollar commemorates the construction of a monument to General Lafayette erected at the 1900 Paris Exposition. Although the Philadelphia Mint struck 50,000 pieces for distribution, the maximum allowed by Congress, only 36,000 coins were eventually sold and the remaining 14,000 examples were melted. An additional 26 pieces were prepared for Assay purposes. Today, the Lafayette dollar is regarded as one of the more conditionally challenging types in the classic commemorative series. 9990005	11217	1836 Gobrecht Silver S\$1 (J-58) - NGC PF64	\$95,000.00	Gobrecht-designed dollars were struck in 1836 to reintroduce the denomination to a new generation. The strike details are full with complete hair definition. All the eagle's breast feathers are completely articulated on the reverse. The production of 18 pieces for the Name Below Base is an apocryphal mintage that is traceable to Edward Cogan in 1867. While no exact mintage is known for this issue, judging from the number of survivors known somewhere around 60 to 100 pieces were probably made. As with all Gobrecht dollars, they were struck in proof format and most likely struck twice to bring up high point definition. This is a stunning Judd-58. The fields are brightly mirrored and devoid of any noticeable contact marks. As mentioned above, the striking definition is strong. The foot of Liberty is the usual place to look for fullness of strike on a Gobrecht dollar, and here it has medal-like clarity of detail. The centers are brilliant with light golden toning encircling the margins. Mintage...probably 60 to 100.
3947221	11282	1838 50C Judd-72 -- NGC PF67 (J-72)	\$26,500.00	Mintage Unknown. Finest Known Proof. Judd-72, Pollock-75, R.5. A draped bust of Liberty facing left wears a diadem and a hair ribbon inscribed LIBERTY. The date appears below the bust with 13 stars around. The reverse presents an eagle with distinctive feathers, holding an olive branch and four arrows in its talons. Struck in silver with a reeded edge and medal-turn die alignment. Both dies are crisp with no evidence of die lapping, clash marks, cracks, or rust marks. The centers of this Superb Gem proof exhibit reddish-orange patina within a frame of light blue and violet toning. The fields are fully mirrored beneath the toning, with lustrous devices and a hint of contrast. NGC has certified two examples as PR67, the other one designated as a Cameo proof (3/13).
3542101	11354	1838 Seated \$1 (J-85) Res. - PCGS PR65+ CAC	\$190,000.00	Mintage...Unknown. These pieces are extremely rare. Many variants of Gobrecht dollars were struck beginning in 1836, continuing in 1837, 1838, and 1839, picking up again in the late 1850s and continuing through the 1870s. Of these many issues the only date that is believed to actually have been coined as a pattern is the 1838. Each side displays variegated shadings of rose, blue, golden, and brown, lighter in the center of the obverse and deeper around the margin. The strike is full. This includes complete definition on the foot of Liberty, the eagle's breast feathers, and the right-side stars on the obverse.
9991840	11478	Undated (1840) P25C Quarter Dollar Master Die Impression, Judd-110, Pollock-123, Unique, and Companion White Metal Hub Trial Piece PR64 NGC.	\$100,000.00	Mintage Unknown. Regarded in the past as a hub impression of the modified Gobrecht Seated Liberty design. We believe this is a trial from the master die. This is the With Drapery design that is struck on an oversized planchet. This impression was struck, according to the Judd book, after Robert M. Patterson asked Robert Ball Hughes to prepare a plaster medallion of Gobrecht's design for use as the basis for a new hub. The Judd-110 appears to have been made on a lathe with fine lines on the blank areas outside the design. Also, each side shows a prominent centering dot. First, while the piece has consistently been termed as brass, it is really brass coated. The underlying core appears to be a base metal, darkish gray in color. The surfaces are bright greenish-brown with oil-slick iridescence in the fields. As mentioned, some of the brass has flaked away. The companion piece encased in the NGC holder is a uniface hub trial, which shows a reversed impression of the design. Rarely Traded. Auction record from 2007...\$69,000.
